SARU offers Recycling and Refurbishment Services

Product Information :

SARU Shielding manufactures and supplies various types of Lead Mats/ Lead Blankets/Curie Mats that are made to customer specification depending upon their shielding application.

Our lead blankets find use in the Nuclear and the Healthcare industries. Our blankets are used to provide temporary and flexible shielding of an area from radioactivity. These blankets can be re-used for a certain period of time keeping in mind the shielding application and the radioactivity.

SARU Shielding Lead Blankets have been used for various applications based on engineered ALARA solutions, involving custom shapes and high temperature rating for achieving the desired protection factor.

The blankets are made to international specifications. This is done by keeping in mind the

- Continuity of the lead wool/foil.
- Ensuring the density of quilting.
- Giving a high quality seal to prevent moisture.
